

ASTAXANTHIN

ABOUT

Astaxanthin is a potent antioxidant (*6000x stronger than vitamin-C*) excellent for anti-ageing, acne, and skin whitening. This is a very concentrated form of Astaxanthin (*a little goes a long way*) The strongest form of Astaxanthin is sourced directly from the *Haematococcus pluvialis* microalgae. Adding astaxanthin to your skin-whitening/ anti-ageing/ acne/ skincare products will boost skin whitening effects and further beautify your skin.

SKIN BENEFITS:

- Reduce Melanin Production by 40%
- Removes Dark Spots & Melasma Patches
- Diminishes Dark Eye Circles
- Removes Age Spots Freckles & Red Spots
- Diminishes Wrinkles
- Remove Redness/Rosacea & Inflammation
- 6,000x stronger than Vitamin-C

USAGE INSTRUCTIONS

Astaxanthin can be added to the skin cream or serum of your choice. Or you can make your own antioxidant skin oil. If you add it to creams/serums, add ½ pump per 8 fl.oz jar of cream/serum. To mix your own antioxidant oil, mix your Astaxanthin with pomegranate seed oil, blueberry seed oil or both. Then add carrot seed, frankincense, and myrrh essential oils (10 drops each per to 8 fl.oz of oil or cream) to you oil and mix thoroughly. Keep you antioxidant oil out of direct sunlight and away from heat or it will be ruined. You can purchase your pomegranate seed oil & essential oils from Mountainroseherbs.com

INGREDIENTS

Astaxanthin (*10% extraction*) extracted from *Haematococcus pluvialis* algae
