

SKIN PEELING SOCKS

DISCLAIMER

Do Not use if you have known allergies to any of the ingredients in this product. If you're diabetic please consult your physician before using this product on your feet. If at any time your skin start stinging or burning, remove the peeling socks and proceed to step #4.

INSTRUCTIONS

#1 This product can be used after your shower, if not, just thoroughly clean your feet first, then pat dry ***Don't scrape or abrade your skin while cleaning or drying your feet. This product contains acid, and will sting if it touches raw skin***

#2 While your feet are still damp put on your skin peeling socks. Massage the sock into your foot so that the mixture totally saturates your foot. Keep the opening near your ankle closed with a small piece of tape.

#3 Put on a pair of large, but snug fitting, socks over the plastic peeling sock. Do this before bed.

#4 When you awaken, remove the socks then wash your feet. After you've washed your feet pat dry. While they are still damp apply Vaseline then put on a pair of cotton socks.

After three days your feet will begin to peel profusely. This product is for maintaining the condition of your feet, if you don't have a massive amount of dead skin. If you have thick dead skin on your feet you will need to use both Glycolic Acid 70% and Saliclear to remove the bulk of it before starting this product.
