

TRANEXAMIC ACID WHITENING PEN

INSTRUCTIONS

First cleanse your skin then pat dry. Apply lemon fresh squeezed juice to your skin then fan it dry. Take your TXA pen then apply the whitening serum to all of the dark patches & dark spots on your skin. Allow the serum to sit undisturbed for at least 30 minutes. After this, you can apply your regular moisturizer all over your face. If you don't have any lemon juice, just skip this step the TXA pen works without it. Like I stated in my 'Skin Lightening Guide' lemon juice boosts the efficacy of any/all skin whiteners & skin bleach. Which gets you faster skin whitening results.
